

QUESTIONING COVID?

Have you felt that there is something “not quite right” about the pandemic proclamation?

Are you skeptical of the never-ending government measures that have curtailed free speech, freedom of association, health freedom, access to schools, houses of worship, gyms and other public places, destroyed over 1.5 million US businesses and thrown tens of millions out of work, and now want to force vaccines on everyone?

Have you been wondering what’s *really* going on?...

IS THERE REALLY A PANDEMIC?

- A 99.74% COVID survival rate (99.997% < 20 y.o.) is not a pandemic – it’s NOT A CRISIS!
- Northern states’ death curves show the epidemic was over in June – it’s NOT A CRISIS!
- The “second wave” was simply the virus moving thru Southern states – it’s NOT A CRISIS!
- 70,000 new college cases but only 3 hospitalizations and zero deaths – it’s NOT A CRISIS!
- Colder weather brings an annual round of respiratory illness & death – it’s NOT A CRISIS!

ARE THE DEATH COUNTS WRONG?

- HAVE MORTALITY COUNTS HAVE BEEN EXAGGERATED?
 - 94% of the people dying from COVID have an average of 2.6 comorbidities
 - It’s sad, but most COVID deaths have come at the age of life expectancy
 - Prescription drugs and pollution may be the COVID “smoking guns”
 - Pandemic measures and the suppression of treatments have caused many deaths
- WHY HAVE THEY STOPPED COUNTING FLU DEATHS?
 - Hiding the context of deaths from other causes keeps the fear & lockdowns going
- DOES COUNTING NEW CASES TELL US ANYTHING USEFUL?
 - PCR tests can be measuring tiny amounts of dead virus, or even previous colds
 - PCR tests return up to 97% false positives and 80% of people never get sick

DO MASKS ACTUALLY WORK?

- Mask pore size cannot stop tiny virus particles – cloth masks do virtually nothing at all
- Masks block O₂, concentrate CO₂ & multiply viruses and bacteria – they can make you sick!
- Decades of guidance from the CDC, NIH, AMA, and WHO all said masks are not needed for healthy people in community settings... Was it the science or the politics that changed?

Tens of thousands of doctors, medical experts, & scientists are also questioning the narrative.
