

Be At Peace

ALL THE NEWS IS GOOD!

1. Healthy people are not driving viral spread!

A Chinese study of 10 million people found ZERO asymptomatic transmission! A JAMA analysis of 54 studies of 77,000 people showed negligible asymptomatic transmission! Healthy people are once again...*healthy!*

2. SARS-COV-2 isn't as dangerous as advertised!

Over 99.7% of people getting COVID-19 survive! Children under 20 are more likely to die in a car accident! For people under 60, it's no more dangerous than the flu. CDC numbers were wildly exaggerated & included flu & pneumonia deaths.

3. COVID-19 is highly treatable AND preventable!

There are many highly effective treatments capable of bringing the death count down by as much as 85%! Nutrients like Vitamins C & D, zinc, glutathione. Drugs like hydroxychloroquine, ivermectin, budesonide and many others! Be at peace!

4. Face masks are not necessary or helpful!

Study after study of masked vs. unmasked counties, states, and countries show that masks made no difference statistically! This conclusion agrees with over 4 decades of mask science, OSHA, and other official sources prior to 2020.

5. A supported immune system can handle anything!

One of the biggest predictors of COVID-19 susceptibility is Vitamin D levels, so that's easily fixed! Those who are dying were already extremely ill with often several chronic disease conditions. Most were over 80 years old. You're safe!

6. We are reaching herd immunity!

The huge drop in cases and deaths since January were not the result of any vaccine, but of reaching herd immunity. Many people already had pre-existing immunity due to earlier coronavirus (common cold) exposure. Emergency's over!

7. A positive PCR test doesn't mean you're sick or infectious!

A PCR test without clinical confirmation of symptoms is next to meaningless. The test works by continuously doubling tiny amounts of DNA; too many doubling cycles can create up to 90% false positives. Even the W.H.O. finally admitted this!

8. You don't need a "vaccine"!

For all of the above reasons! Even experimental mRNA shots can only be "emergency authorized" when there are no available effective treatments (there are!) and when the injection is safer than the virus or treatments (not proven so far!).

9. Lockdowns aren't necessary or effective!

At least 40 COVID-era studies so far show that lockdowns do not work! Even the W.H.O. never previously approved of lockdowns for airborne infectious diseases. Just look at Sweden or other US states without lockdowns, they are far better off!

10. We can open back up fully!

Many states and countries are now opening up! They have realized that they overreacted by following provably faulty projections and highly questionable and politically motivated "science." NH can open up now too! Be at peace!
