

Did the FDA really approve of the Pfizer/BioNTech vaccine? *Kind of, both yes and no.* It appears to have been a ruse by the FDA to try to get around the regulations and prevent a more public inquiry of the true scope of vax injuries and deaths, and to avoid a looming lawsuit by Children's Health Defense. Read the RFK Jr and Dr. Meryl Nass article about it [here](#), and watch as RFK Jr discusses this in greater detail with Mike Adams in an interview [here](#).

While you're at it, check out the following explosive interview from the Stew Peters Show: [Former Pfizer Employee: "Checkmate. Game Over. We Win"](#)

And check out [this recent episode \(#4\) from Brattleboro Community TV](#), featuring yours truly discussing the long con of PCR tests.

Today, the Keene Sentinel also [published my LTE](#) challenging vax safety claims.

Finally, you're invited to listen in and call in to Rebecca Montrone's Wondrous Roots show on WKBK Keene (94.1FM/1290AM, and streaming at <https://wkbkradio.com>) at 12 noon tomorrow (Saturday), where I will also be joining her to cover the latest news and scandals.

Let's do this.

## Don't Let Lawmakers Shrug Off Their Duty To Protect

"Every part of the Covid response is wrong. This is a government-created problem working its way through heavily regulated industries and manifesting itself in every facet of our lives. While the primary purpose of government is to protect the rights of the people, it is now colluding with big business to violate rights with intention. It is up to our elected officials to call off this destructive insanity and bring the people back together in the spirit of freedom. It is the responsibility of the Legislature to protect people from such violation of their fundamental rights, and it matters not whether the bad actors are in the public or private sector. It's time for the law to protect individual rights to bodily autonomy when it's clear that government bureaucrats are acting through the hands of private employers."

## Lies, Damn Lies, and Propaganda!

The CDC claimed (and the mainstream press dutifully repeated) that **"99% of new cases are in the unvaccinated."** They failed to offer a single shred of evidence. Yes, they lied.

### HERE'S THE TRUTH (with evidence - please read for yourself):

In Israel, the most Pfizer/BioNTech-vaccinated country on Earth, the vaccinated are at **27 times higher risk of COVID infection when compared to those with natural immunity** (<https://bit.ly/3BiIRaH>). Turns out natural immunity is king (<https://bit.ly/3jjk940>).

But it gets even worse. An Oxford University study found vaccinated individuals carried **251 times the load of COVID-19 viruses in their nostrils compared to the unvaccinated** (<https://bit.ly/2WAcAgC>).

In the US, "breakthrough" cases (meaning "vaccine failure") are happening everywhere ([bit.ly/3jjGzSy](https://bit.ly/3jjGzSy)). **YES, the vaccinated can spread the virus, and many are dying.** *So, uh, why have vaccine passports?*

That dreaded "Delta Variant"? Turns out it is **much less dangerous**, more like the regular flu (<https://bit.ly/2Y0rEVn>).

While our hospitals are telling people to "stay home until the symptoms get worse," **life-saving early treatments go unused or are outright denied, and people are dying** (<https://bit.ly/3jjlc3W>).

Think the vaccine just got approved? Even that was a trick to get us to accept their provably dangerous product (<https://bit.ly/2WtRe11>, <https://bit.ly/3Bkd71A>, [www.OpenVAERS.com/covid-data](http://www.OpenVAERS.com/covid-data)).
