## System B Discussion & VCAL Site Demo

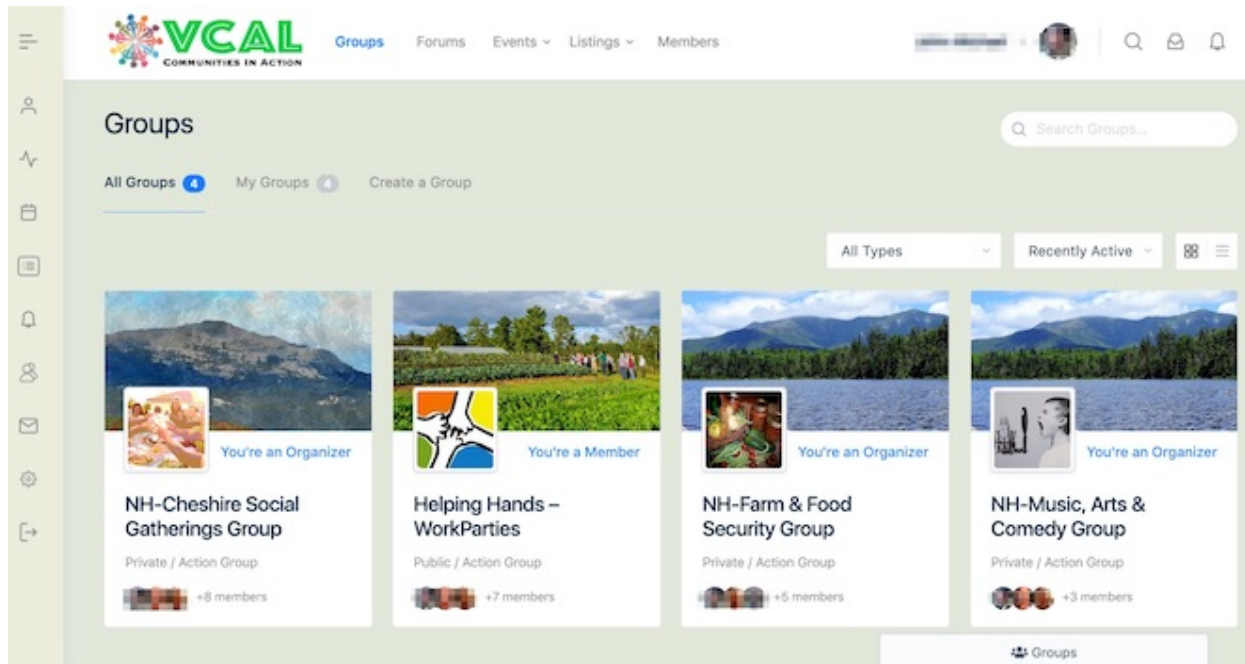

This past Monday I suggested a framework for thinking about what we as a network of people can do to better prepare for coming shocks by creating a parallel "System B" to address community needs. The framework addresses:

1. Relocalization of Production and Supply Chains (especially: food, water, energy)
2. Community Networking (buy-sell-trade, skills sharing, action groups etc.)
3. Skilling Up (lifelong education and essential life/maker skills)
4. Local and Telemedicine Options
5. Local Currency Systems

For more details, download the document: [Ideas for Creating System B](#). You can watch the zoom recording [here](#).

[On the zoom call](#), I also demo'd the **VCAL (voluntary civic action league)** website that operates much like other social media sites – activity feed, friending, following, etc. – and also has an events calendar and a Craigslist-type directory for posting products, services, jobs, etc. The site is designed to help people find like-minded others and features tools for forming action groups, freedom cells, or hosting other groups, schools, businesses, etc. Groups can manage all communications in one place, including messaging, forums, chat,

document sharing, project management, and events; one can even run zoom meetings from directly within your group's page.

In order to maintain and build trust, this is an invitation-only website with no public-facing content. To get an invite, write to [admin@riseupnh.org](mailto:admin@riseupnh.org), and please include your phone #. Invites may also be tendered by current members.

Let's do this!

## *Now on the VCAL site...*

### Wood Cookstoves

*By John Yannacci*

In the world of prepping; wood cookstoves are next level preparedness.

Imagine that it is 7pm, it is the middle of January, it is snowing out, you and your family are sitting on the couch watching Netflix, the electricity suddenly goes off and does not come back on for two years.

You were prudent and put aside food, water, candles and lanterns, all of that, but what is your plan to cook that food, to heat that water?

The answer lies In the past, in certain areas of the world today and even within certain cultures and sects within our own country: the wood cookstove

In my opinion it takes considerable foresight and fortitude to be a prepper. You are dedicating time, effort and often considerable money to put in place preparations that may never be needed. The hitch is that if you do need them, they become critical.

I will admit that getting a wood cookstove properly installed in your home is no easy win. You can run into all manner of unexpected hurdles and expenses. That is what this thread is about; giving you a primer on what to expect.

The stoves:

When most people think wood cookstoves they think of something like the Glenwoods. The Glenwoods remind me of Ma Joad from The Grapes of Wrath; plump, capable and old fashioned. My issue with them is exactly that: they are so big. In many cases, this stove is not going to be used until it is absolutely needed. So, in my opinion, you would be better off with a stove that is completely capable but takes up a smaller footprint.

This is where the Danes come in. The Danes were masters at producing pre EPA wood cookstoves. Denmark is home to three major wood stove foundries; Jotul, Lange and Morso. Two of which, Jotul and Lange, produced two of the finest wood cookstoves ever made. My #1 pick for a wood cookstove is the Jotul 404. It is small, beautiful, easy to use and extremely capable. There was a time when you could go on Craigslist and find one right off for \$400. Unfortunately, those days are over. There is significant pressure on the wood cookstove market and the cat is out of the bag on this beauty. Still, you never know; Craigslist, Facebook Marketplace, Google Advance Search and eBay. At this stage of the game I would pay up to 2K for this stove in good, usable condition....

*To read more of this article and see lots of photos of wood cookstoves and exhaust piping installation, as well as other articles by John Yannacci (all in the public Prepping group), go to the VCAL site (if you are a member) or request to join by writing to [admin@riseupnh.org](mailto:admin@riseupnh.org). Thanks, John!*

Hospitalizations are rising faster in New Hampshire than in any other state in the country, despite ~100% of everyone over 65 at least partially vaccinated, so we have to ask yet again, why did Ron DeSantis do this to them?

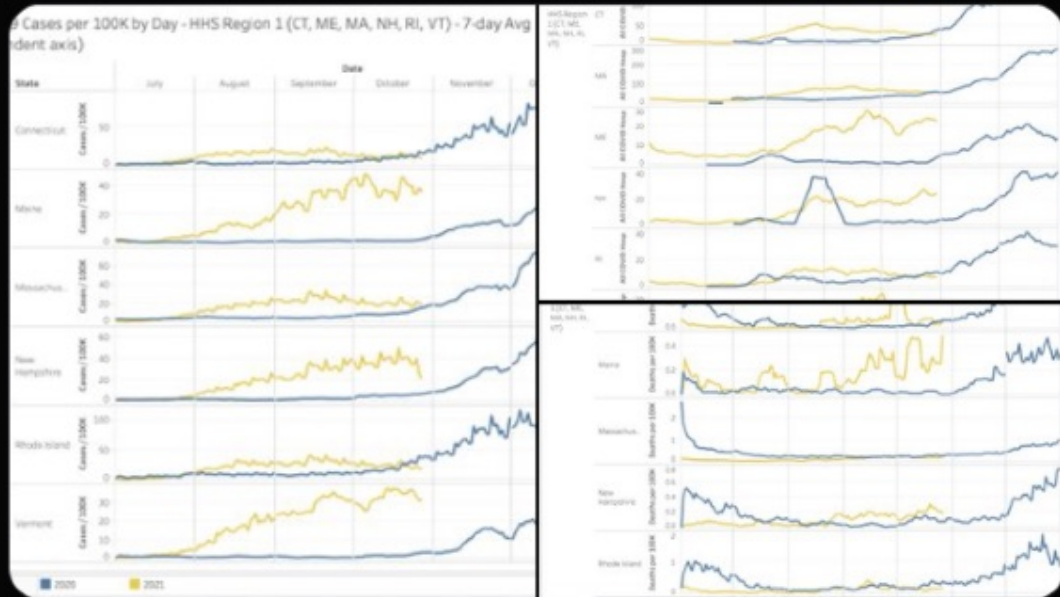

4:51 PM · Oct 28, 2021 · Twitter for Mac

**Justin Hart** @justin\_hart · 1h

Some of the highest vaxxed states in the nation in New England are experiencing their highest case rates, hospitalizations, and deaths. Same level or higher than last year for many of these states. CT, ME, MA, NH, RI, VT

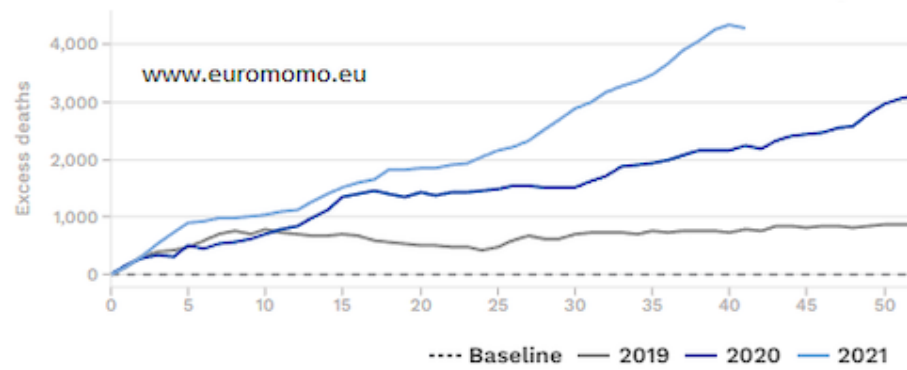

What is causing all the deaths of those under 45? It isn't COVID.

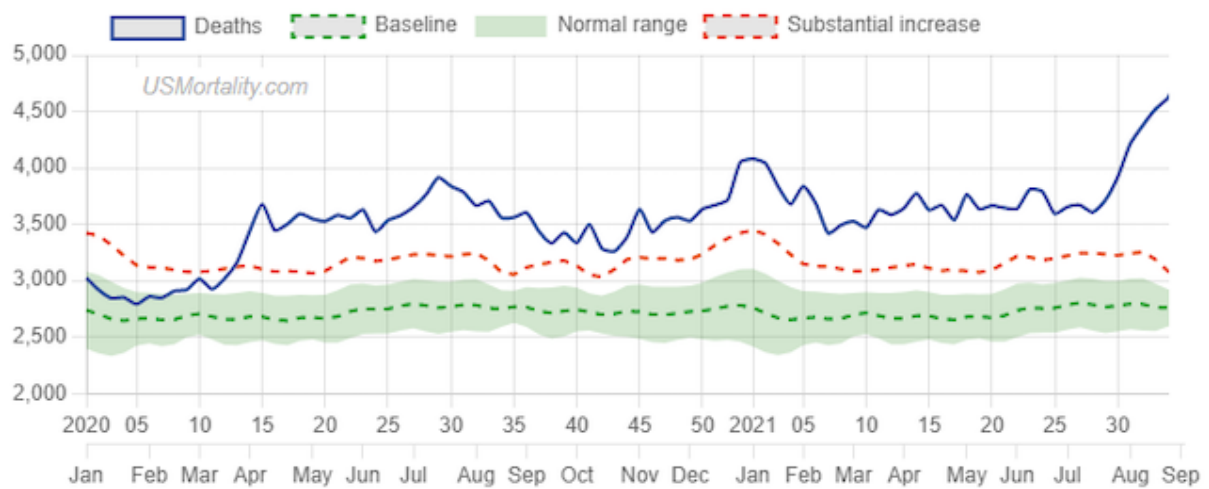

15-44 years

Europe

### United States: 25-44 Years

**Marty Makary MD, MPH** ✓

@MartyMakary

Fluvoxamine resulted in a 66% reduction in COVID hospitalization and 91% reduction in COVID death rates among high-risk patients compliant with the regimen. It's also available right now.

No one should be dying of COVID right now.

**drklausner** @drklausner · Oct 28

Fluvoxamine is a safe, widely available, cheap and highly effective treatment shown by multiple studies including 2 RCTs. Should be added to NIH COVID-19 treatment recommendations immediately. @NIH @NIAIDNews

@clif\_high

German state of Saxony is preparing to lockdown UNvaxxed only. They cite increased cases as reason. Case rise with vaxx rollout. This will prove it is only the vaxxed carrying the disease.

Depop agenda?

Can all the politicians be this stupid?

# CHOOSING YOUR COVID-19 VACCINE

## FACTS YOU NEED TO KNOW

**Pfizer:** \$4.7 billion in fines for false claims, drug and medical equipment safety violations, off-label promotion, corrupt practices, kickbacks, and bribery.

**Moderna:** Has never brought a vaccine to market since its founding, despite fielding 9+ vaccine candidates, none of which made it through phase 3 clinical trials.

**Johnson & Johnson:** Named in hundreds of thousands of lawsuits for toxic and/or dangerous products, including drugs, shampoos, medical equipment, and asbestos-contaminated baby powder.

**AstraZeneca:** Suspended by two dozen European countries due to severe, lethal adverse reactions, like blood clots.

## Don't worry, you're in safe hands!

If you're vaccinated, remember to wear a mask and socially distance because you can still spread COVID-19. Trust The Science™

In the beginning of a change, the patriot is a scarce man, and brave, and hated and scorned. When his cause succeeds, the timid join him, for then it costs nothing to be a patriot

(Mark Twain)
