Weekly Keene Protest to Move to Area Towns

We've decided to take our protest to different towns around the Monadnock Area so that more people get to see and understand that there are folks standing for a different narrative.

This Thursday, 11/18, we're going to be at the intersection of Rt 12 and Rt 119. Troy circle from 3:30-5PM. Park at the Antiques building. There's a grassy area at the intersection. Stay tuned for new town TBA each week.

If you are in a different area of the state, please consider starting a protest regularly in a town near you. Please contact me if you'd like help getting others there.

Stand Up for Medical Freedom on Fridays, 4-6pm

On the public sidewalks outside Mount Wachusett Community College, 444 Green Street, Gardner, MA 01440 (on Green Street between Heywood Hospital and the public golf course). Bring signs, bring the flag or just bring yourself. All are welcome (to peacefully protest mandates). Coercion Is Not Consent. Stop the Mandates. We the People. Organized by Kate, "The Ornerly Nurse."

LETTER TO THE EDITOR

The Keene Sentinel is utterly failing in its charter as a member of the Fourth Estate to place a check on government and corporate overreach. Its latest ploy is to append advisory notes, much like Facebook does, to letters contradicting the official “safe and effective” vaccine narrative.

A modicum of journalistic effort would reveal the Sentinel’s claim that VAERS (Vaccine Adverse Events Reporting System) is “open to abuse” is a ludicrous straw man argument. This is because the CDC routinely follows up with each claim, often multiple times, to determine its validity. Given this, and that reporting falsely to VAERS is a felony, the probability of “made-up reports” is close to zero.

Please watch this video of Deborah Conrad, a NY hospital physician’s assistant who reported multiple CV19 vaccine injuries to VAERS: <https://bit.ly/3w7xDER>. Her testimony not only provides insight into the CDC’s vetting process, but bolsters the claim that as little as 1% of adverse events ever gets reported (Harvard study: <https://bit.ly/3cWoXYT>). In fact, Conrad’s hospital warned her to stop reporting. Then it fired her.

Likewise, it would take little journalistic effort to discover more about the risk of blood clots; for J&J vaccines, MedPage Today reported “women in general having a 5.1-fold higher risk after vaccination” (<https://bit.ly/2Yb5lr5>). [OpenVAERS.com](https://openvaers.com) shows 14,670 reports of blood clots related to CV19 vaccines. Post-vaccination D-dimer tests performed by Dr. Charles Hoffe of Alberta showed 900 of his patients had blood clots (<https://bit.ly/3lQTCwv>). The CDC admits the vaccines can lead to heart problems among the young (<https://bit.ly/3w7Bzp7>). And why is there no investigation into the more than 27,000 of our fellow Americans permanently disabled by the vaccine?

Recently eleven physicians – many vaccine-injured themselves – came forward with testimony of serious CV19 vaccine injuries and deaths (<https://bit.ly/3bBHfhy>). Much of the official response was, “It’s all in your head.” Really.

Regarding deaths: VAERS shows 13% occur within 24 hours of vaccination, 19% within 48 hours, and 33% when symptoms begin within 48 hours. Not conclusive? Perhaps, but the CDC isn’t even investigating. In a striking departure from all other new drug introductions, it has no data safety monitoring board and no autopsy commission for the COVID vaccines. Sentinel reporting on this: zilch.

Truth is not a singular narrative. It only proceeds by thesis and antithesis, by rigorous debate of diverse perspectives. And informed consent requires FULL disclosure of both risks and

benefits.

The Sentinel seriously needs to step up.
