Concord: Unmasking Hearing This Wed 3/30

From RebuildNH

The bill to prohibit mandatory masking in NH schools (HB 1131) has a hearing scheduled for this Wednesday, March 30 at 10 am! Mark your calendars. We need a LARGE crowd. It is very important the public shows up in person to support this bill. Either testify or simply sign in to support the bill in person. While the House is usually quite responsive to the will of the People, it takes more effort from the People to prevail in the Senate.

Wednesday, March 30th @ 10 am
Legislative Office Building, room 101
33 N. State St, Concord

Please see other [Lawmaker Outreach Priorities from RebuildNH](#) at the bottom of this newsletter

EVENTS

Every Wednesday

RiseUpNH lunch at Country Life Restaurant, 12-2PM-ish, Roxbury St off the Square in Keene. No agenda, just good times and lots of informational info sharing and networking.

EMF Expert Panel Tonight 7PM

EMF Expert panel Monday 3/28 7PM, Pittsfield MA (via Zoom)

- Theodora Scarato, MSW, Environmental Health Trust Executive Director
- Martin Pall, PhD, EMF Scientist
- Elizabeth Kelley, MHA, EMF Medical Conference Executive Producer, International EMF Scientist Appeal Director
- Patrick Abrami, New Hampshire State Representative
- Cindy Russell, MD, Physicians for Safe Technology Director

This is an incredible opportunity to learn from world-leading experts, and to pose your questions via the chat!

The Art of Navigating Difficult Conversations

Building Resilient Relationships with Nonviolent Communication

with Kristen Reynolds and John-Michael Dumais

Thriving relationships and communities take good communication. Most of us don't learn much in the way of communication skills growing up, because our society has an idea that communication is natural and instinctive. Our *desire* to communicate is instinctive, but the *ability* to do it well is not.

Nonviolent Communication, founded by Marshall Rosenberg, is one of the best communication skill sets for improving relationships and helping groups stay together, especially during this time of great stress and change.

Cost: \$10-\$20 sliding scale

Pre-register with Kristen at kreynolds3000@gmail.com

Saturday April 2, 1-3PM, Country Life Restaurant, Keene

To register, contact Kristen at kreynolds3000@gmail.com. See additional article below.

April 3 Sunday: NH Committee of Safety State Assembly

Old Town Hall, 45 Washburn Rd, Alexandria, 3-6PM

April 9: Celebrating Michael Walsh (RSVP)

A celebration of Michael's life will take place on Saturday, April 9th at 10:00 a.m. at Christian Life Fellowship Church, 211 Whitcomb Rd, Swanzey, NH. A graveside service with military honors will follow at Mountain View Cemetery in Troy, NH. The family will host a luncheon in Michael's honor at The Pub Restaurant, 131 Winchester St, Keene, NH, at approximately 1:00 p.m. Flowers will be gladly accepted. Donations to the MJW Memorial Fund can be made online at <https://tinyurl.com/4vh5af6y> or mailed to PO Box 31, N. Woodstock, NH, 03262. **Please respond to Justin Walsh, jwalsh9521@gmail.com, with your intention to attend the lunch, so he can have a head count.**

April 2 Workshop: Getting Beyond Win-Lose with Nonviolent Communication

by Kristen Reynolds

I am very excited to be here in Keene and have a chance to get to know such a great group of people. I love the diversity of ideas and backgrounds that have found refuge together. Whenever I join a group like this I have high hopes. There's nothing like the camaraderie and collaboration of a group of people. I've started groups and maintained groups over the years and have loved seeing people flourish within them.

But as with any relationship there is always a test to see whether people are committed to

working through differences. Our culture teaches people to walk away if we encounter different opinions or beliefs. Cancel culture really is just the extreme end of a tendency that is already there. All we have to do is listen to our so-called leaders to hear disdain not only for opposing thoughts, but for even listening to opposing thoughts.

I would love to see this group's connections deepen and grow over time. I truly believe that Nonviolent Communication will be one of the best tools to make that possible. It helps that you have someone as skilled as John-Michael facilitating this group. But one skilled person is not enough. It would be good if a bunch of people in the group had strong communication skills.

Nonviolent Communication (NVC) is set up in four parts: figuring out what the problem is, tuning into the feelings that come up around the problem, understanding the motivation or need behind the feelings and then coming up with a workable resolution. Each part can go pretty deep. Each part has the ability to heal. Anybody that knows even a small bit of each part will be more able to weather differences and disagreements.

Often what tears groups and couples apart is the fear of losing. Our culture starting from day one is that in any difference of opinion or need, someone is going to be the loser. Either your idea will be called completely stupid, your need will be stupid, or you won't have the power to get what you want. Most of us can recall a parent or teacher cancelling our needs, telling us to stop talking and just be obedient. And that is the beginning of cancel culture, with social media simply spreading the cancel far faster and wider than old-fashioned word of mouth.

What we need is a new culture, and I nominate Nonviolent Communication as the template, where everyone wins. There is just no such thing as a loser in NVC. Now what I mean has far more depth than I can go into here and I would highly recommend reading Marshall Rosenberg's book "Nonviolent Communication" to understand exactly what I mean.

But imagine for a moment... what if you knew for certain that you would always be heard and understood and your needs acknowledged in every conversation going forth? What if you knew for certain that the argument would end with some sort of agreement that took into account your concerns? Would you be more willing to try to talk it out instead of retreat?

My partner and I have such a culture in our home and it has transformed my life. I'm not scared to share my worries and differences. I never worry that he'll just yell at me or try to make me small. I know that things will be better after I share. It's a sweet freedom.

My hope is that some of you will want to learn this amazing tool for communication. I'd love for you to join me on April 2nd in Keene (see ad in Events above) as I go over what NVC is and give a demonstration of it in action.

Peter McCullough, MD MPH

@P_McCulloughMD

Schauer et al, Journal of Pediatrics, confirming cardiologists' worst fears for young boys/men with VI-mycarditis. Heart damage (LGE) is still present at over 4 months since taking the ill-advised products. Likely will lead to scar and risks for future cardiomyopathy, VT, VF

Figure 2. CMR images from 3 days after admission of a 16-year-old male who presented to emergency room with chest pain and elevated troponin 3 days after receiving Pfizer COVID-19 mRNA vaccine. Initial CMR. 1a and 1b. subepicardial to midmyocardial LGE in inferior and inferolateral LV wall from base to apex (arrows). 1c shows T2 hyper-intensity in similar segments, consistent with edema. 1d, 1e and 1f. Follow up CMR 4.4 months later. LGE still persistent but decreased from 26% to 19.84% (arrows), LVEF remained stable at 58%. There is improved T2 hyperintensity.

Replying to @DowdEdward

Here are the top 6 studies showing that the odds of developing myocarditis from the “vaccines” are greater than the odds of developing myocarditis from COVID-19 for those under age 40:

sensereceptornews.com/?p=3542

CONCLUSION: “A total of 257 CAEs [cardiac adverse events] were identified. Rates per million following dose 2 among males were 162.2 (ages 12-15) and 94.0 (ages 16-17); among females, rates were 13.0 and 13.4 per million, respectively. For boys 12-15 without medical comorbidities receiving their second mRNA vaccination dose, the rate of CAE is 3.7 to 6.1 times higher than their 120-day COVID-19 hospitalization risk as of August 21, 2021 (7-day hospitalizations 1.5/100k population) and 2.6-4.5-fold higher at times of high weekly hospitalization risk (7-day hospitalizations 2.1/100k), such as during January 2021. For boys 16-17 without medical comorbidities, the rate of CAE is currently 2.1 to 3.5 times higher than their 120-day COVID-19 hospitalization risk, and 1.5 to 2.5 times higher at times of high weekly COVID-19 hospitalization.”

Post-vaccination CAE rate was highest in young boys aged 12-15 following dose two. For boys 12-17 without medical comorbidities, the likelihood of post vaccination dose two CAE is 162.2 and 94.0/million respectively. This incidence exceeds their expected 120-day COVID-19 hospitalization rate at both moderate (August 21, 2021 rates) and high COVID-19 hospitalization incidence. Further research into the severity and long-term sequelae of post vaccination CAE is warranted. Quantification of the benefits of the second vaccination dose and vaccination in addition to natural immunity in this demographic may be indicated to minimize harm.”

[LINK TO STUDY](#)

1. Medical Journal (not yet published in peer-reviewed journal) dated December 21, 2021

TITLE: Risk of myocarditis following sequential COVID-19 vaccinations by age and sex

METHODS: “In brief, we used the NHS Immunisation Management Service (NIMS) database, which includes data for all people receiving a COVID-19 vaccine in England. We linked individual patient data to national data for hospital admission, mortality and SARS-CoV-2 testing to examine associations between exposures to the first, second or third dose of ChAdOx1, BNT162b2 or mRNA-1273 vaccine, or a positive SARS-CoV-2 test before or after vaccination, and hospital admission or death from myocarditis. The self-controlled case series (SCCS) method [13, 14] compares the incidence rate of myocarditis in exposed and unexposed periods within individuals implicitly controlling for within person covariates. The incidence rate ratio (IRR) is calculated for hospital admission or death in a 1-28 day risk period after vaccination or a positive test, compared to baseline periods. The IRR was calculated following stratification by sex and age in those younger or older than 40 years.”

CONCLUSION: In summary, the risk of hospital admission or death from myocarditis is greater following COVID-19 infection than following vaccination and remains modest following sequential doses of mRNA vaccine including a third booster dose of BNT162b in the overall population. However, the risk of myocarditis following vaccination is consistently higher in younger males, particularly following a second dose of BNT162b vaccine.

Not only are there compelling studies evincing the COVID-19 “vaccines” are more likely to induce myocarditis than the disease itself in those under 40, Sweden and Finland have already withdrawn the use of Moderna in those under 30.

As Reuters reported on October 7, 2021, Finland joined Sweden in limiting the Moderna “vaccine” for those under 30. (Note that according to a Reuters report on October 8, 2021, Denmark said it never stopped vaccination of the young with the Moderna “vaccine.”)

As of January 17, 2022, the Finnish Institute for Health and Welfare says that “The Moderna Spikevax vaccine is not currently offered to boys and men under 30 years of age in Finland, as according to a Nordic follow-up study, the highest number of myocarditis cases has been observed in young men after coronavirus vaccination.”

On October 27, 2021, Reuters reported that Sweden’s health ministry had extended the pause on the use of the Moderna “vaccine” for both men and women born 1991 or later.

Also note that according to a November 9, 2021 report by Reuters, France began to recommend against the use of Moderna in males under 30. Germany, likewise, has recommended against the use of the Moderna “vaccine” for those

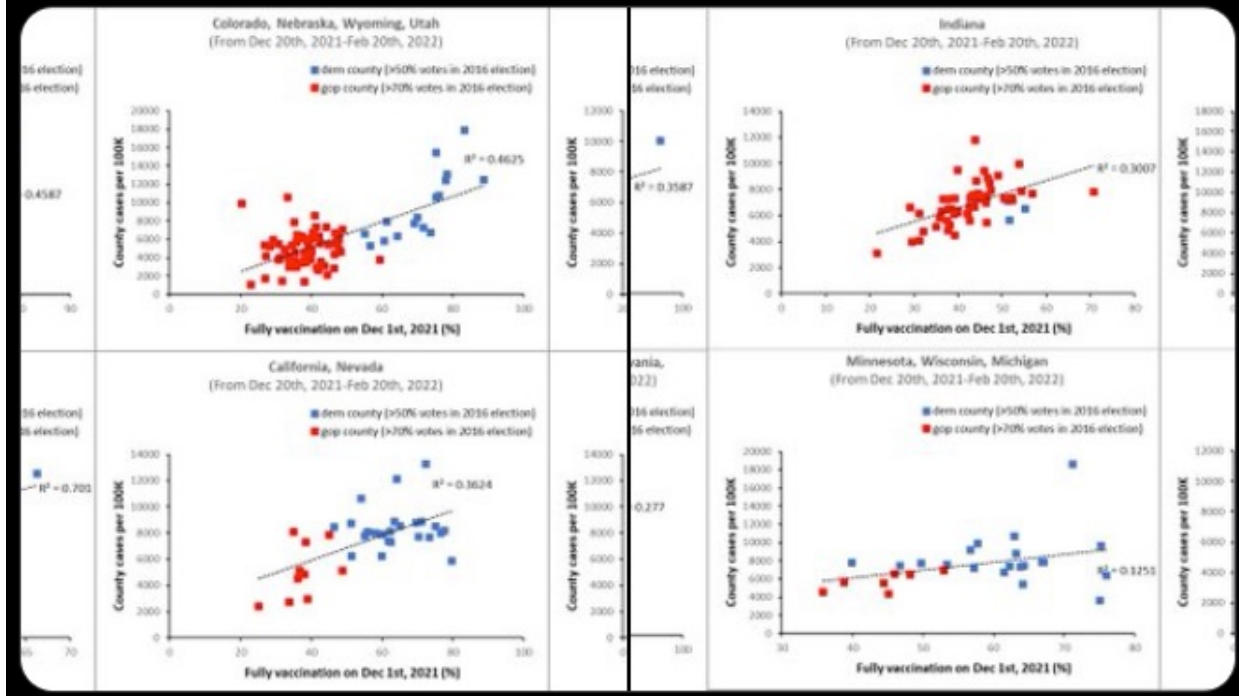

Mahmudur Rahman, PhD

@mahmudme01

These are the US states where the Omicron surge was positively correlated with the vaccination rate. It is really important to thoroughly investigate if vaccine plays role in driving COVID cases.

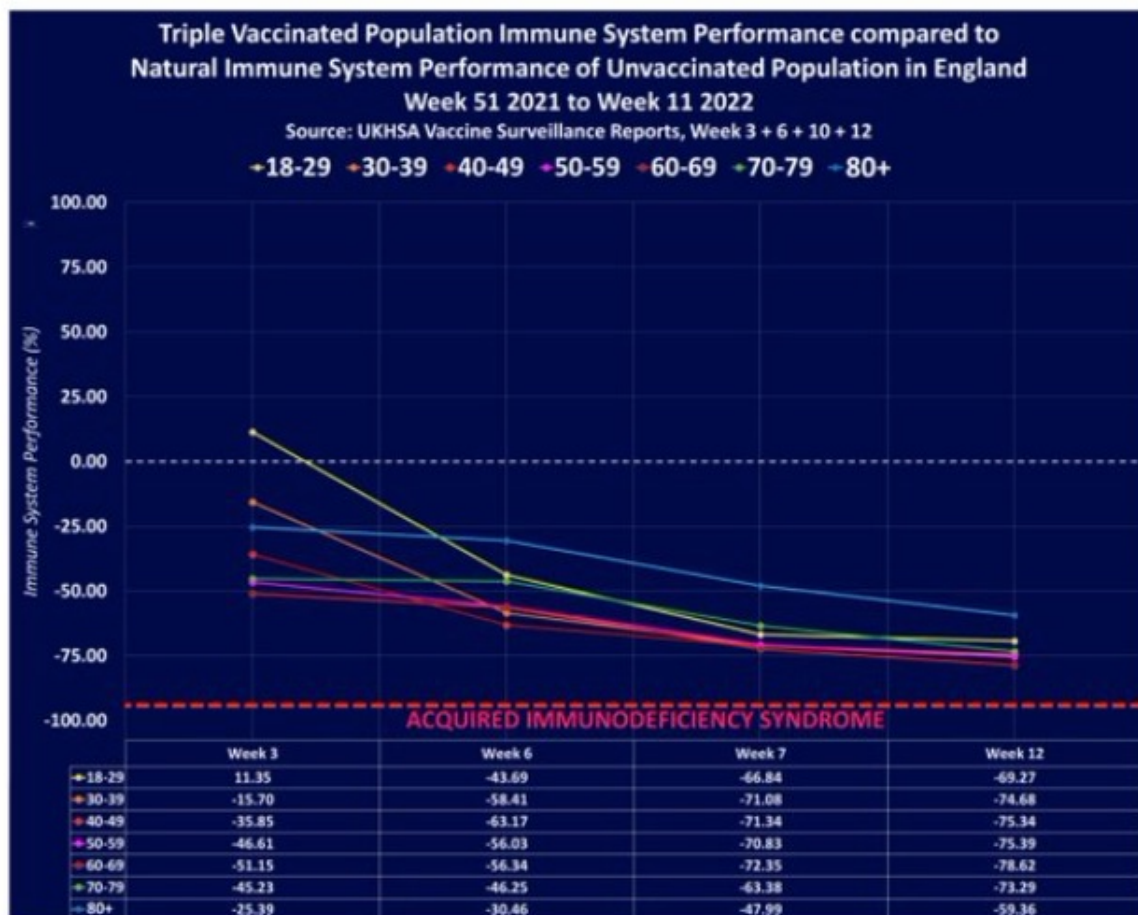

Kelly Kivett
@kellyjo0813

Official UK, Canada & New Zealand Government data suggests the Triple Vaccinated are now suffering Acquired Immunodeficiency Syndrome.

In short, because authorities in the UK, Canada and New Zealand have done such a good job at collating and publishing data on Covid-19 by vaccination status, they have exposed the fact that the triple vaccinated population are rapidly developing some new form of Covid-19 vaccine induced Acquired Immunodeficiency Syndrome (AIDS).

Instead of "death" rate.. LETS LOOK AT COVID "SURVIVAL" RATE??

Legislative Activism

from RebuildNH

The Senate Needs to Hear From YOU!

Tell Senators to Honor the Deal for State of Emergency Reform

Watch to find out which legislative action to get involved in this week. [Click here to watch.](#)

We need your help to encourage the Senate to support [HB 275](#) this week, which is currently sitting idle in the [Senate Committee on Executive Departments and Administration](#). This is the language that we facilitated in an agreement between the House Freedom Caucus, Senators and the Governor in order to support the budget last year in [HB 2](#). The Senate and Governor agreed to this language in order to garner support from Freedom Caucus members. It's time to encourage the Senate to honor that deal.

To give you a quick overview of the difference between these two efforts, consider section 91:459 of [HB 2](#) and contrast that with the language in [HB 275](#). The language that became law theorizes that a State of Emergency is the natural condition of government and requires both the House and Senate to vote to end it. We disagree, and therefore pushed for the language in [HB 275](#). This language theorizes that a Constitutional Republic is the natural condition of government and that both the House and Senate ought to have to vote to continue a State of Emergency, and otherwise it should automatically end.

Because of our disagreement, we encouraged our RebuildNH representatives to hold back their vote on the budget. In that effort, an agreement was made among House leaders, the Senate and the governor to accept our language in exchange for a positive vote for the budget. Now it is time to ensure we get our side of the deal, so please contact the Senate today and urge them to honor their word.

You may choose to target your efforts on Sen. Jeb Bradley and Sen. Chuck Morse, the Senate leaders, by calling Bradley at 603-271-3266 or Morse at 603-271-3479 or emailing them at Jeb.Bradley@leg.state.nh.us and Chuck.Morse@leg.state.nh.us or contacting the whole Senate by following the instructions below where we list the entire Senate contact list.

Support Liberty Even During An Emergency

In another major effort, we are asking you to contact Gov. Chris Sununu and ask him to sign [HB 440](#) into law. This bill protects civil liberties even during a declared State of Emergency, which is basic common sense. Please call the governor at 603-271-2121 or email governorsununu@nh.gov and remind him that it is his constitutionally sworn duty to protect the civil liberties of his constituents. Protecting New Hampshire from the potential overreach of his successors is another one of his responsibilities while in office.

Encourage the House to Support Medical Freedom for Health Workers

Support OTP-A: [HB 1604](#), including state medical facilities in the statute providing medical freedom in immunizations. [HB 1604](#) is coming back to the House for a second vote with [a new committee amendment](#). The bill would add state-run medical facilities into the Medical Freedom in Immunizations Act, by providing employees of these facilities a streamlined vaccine exemption process that must be granted. This bill barely passed the House the first time around and the main excuse given by a handful of Republican representatives was that the bill could jeopardize Medicare and Medicaid funding. Now, the bill has been amended in House Finance and would no longer jeopardize this funding. Please contact the representatives who voted "no" the first time and inform them of this development in the committee amendment, asking them to support the amended bill.

[email your representatives by finding them here.](#)

Senate Committee Hearings This Week

We really would love for you to show up for these two Senate committee hearings on Wednesday. You all came out in a snow storm to support HB 1131 in the House, and now we need a larger show of force to get this past in the Senate. While you're at it, please support HB 1044, a bill that will drastically improve medical services that are available without being tied to federal funds and federal strings. Please try to be there on Wednesday!

Wednesday, March 30, 2022 | N.H. Senate

[Senate Committee on Health, Human Services, and Elderly Affairs](#)

State House, Room 100

9:45 a.m. —SUPPORT—[HB 1044](#), relative to direct payment and membership-based health care facilities. This is a really important bill, that amazingly would carve out an exemption allowing business ventures to create hospitals and other medical facilities that only accept direct payment, which would exempt them from federal COVID regulations and other potential federal overreach. Please [Click here to register your disposition](#). [Email the committee](#).

10 a.m.—SUPPORT—[HB 1131](#), relative to facial covering policies for schools. This bill prohibits public schools from creating policies that force students or members of the public to wear masks. Please [Click here to register your disposition](#). [Email the committee](#).

Senate Session This Week

OPPOSE OTP, SUPORT ITL: [SB 382](#), relative to licensure requirements for telehealth services. Apparently Senators have been convinced by their lobbyists to support this bill, and that is a serious problem. **This bill is EVIL!** This bill would prohibit telemedicine from any practitioner not licensed in New Hampshire, which would cut-off effective COVID treatments from people who have been receiving them from out-of-state telemedicine doctors. The N.H. Legislature does not have the authority to regulated interstate commerce, because this power is delegated to the U.S. Congress in the U.S. Constitution, and thus we believe this bill is unconstitutional! This bill needs to die.

For the most up-to-date information on what is coming up, join RebuildNH's [Telegram Channel](#) or [our Facebook page](#).
