

Newsletter Friday June 17, 2022

Welcome to our **Friday Edition** newsletter with curated news of the day.

HIGHLIGHTS: **FDA advisors support kiddie shots** (surprise, surprise) while **Germany, France, Denmark, Norway, Sweden & Finland all suspend Moderna jabs** for people under 30 due to safety concerns, and further evidence for **fatal brain and heart issues** from jabs mount; the **Jan 6 Commission show trial** continues; the **Corona Investigative Committee Grand Jury** issues its closing statements; **Fauci gets COVID** (really), while the **economy melts down** and **food and water shortages** loom. James Howard Kunstler aptly captures the zeitgeist with his blog post today, [How Low Can You Go? Lots of things are going south all at once....](#)

We hope you can join us for our **cookout/music/bonfire gathering tomorrow (Saturday) in Keene** (details under Events below).

We are now featuring three new sections to the newsletter: **Relocalization**, **Rebuilding Culture**, and **Technocracy & Transhumanism** - see sections below.

As is customary, **Memes** can be found at bottom.

To Freedom and Victory!

OPEN ACCESS

As of March 2, 2021, 51,755,447 doses of various vaccines have been administered in the United States. A total of 9,442 adverse reactions to the vaccines, including 9 cases of ATM, have been reported in the vaccine adverse event reporting system.¹² In Korea, as of August 2021, 13,868,460 residents have been vaccinated. Adverse events have been reported in 28% of the recipients. Out of these adverse events, 4.3% were reported as serious events, excluding death or anaphylaxis.¹⁴⁻¹⁶ The vaccines for COVID-19 received emergency approval. There was limited time to observe the side effects after vaccination. Therefore, studies with a longer study period, including observational studies, are needed to elucidate the causal relationship between neurological complications and mRNA vaccination.
