

Newsletter - Friday June 24, 2022

Welcome to our **Friday Edition** newsletter with curated news of the day.

NEWS HIGHLIGHTS TODAY: **SCOTUS** rulings: **nixes NY's restrictions on Open Carry**, **overturns Roe V Wade**, **refuses to give Bayer/Monsanto a hearing over glyphosate cancer claims**, and **strikes down Maine's ban on funding for religious schools**. Extreme **Leftist elements are expected to riot**. Elsewhere, the **kiddievax gets a lukewarm reception**, more **job dangers are confirmed**, the **economy teeters further** (by design), and the **US seems hell-bent on starting WWII with Russia**. Other than that, where we are at least, it's another day in paradise. :-)

Tomorrow, Saturday June 25, join **Rebecca Montrone and me (John-Michael)** as we go **live on www.wbkradio.com at 12:05PM to discuss the absolute insanity of vaccines for infants and toddlers**, and related issues.

Monday's zoom addressed the problem with antiracism as a strategy; sovereignty and breaking the authoritarian paradigm; authoritarianism's roots in childhood trauma; and further perspectives on the pandemic and the emerging economic crash. Watch on our site [here](#) or at Brighteon [here](#).

Our [Personal Preparedness Survey](#) is a completely anonymous survey covering the topics of **food, water, shelter/energy, medical, financial, travel, and community preparedness**. It will help you assess your own preparedness given the potential disruption scenarios. It will also help us get a handle on what our members are seeing, needing and wanting. We'll be reviewing the aggregated responses to determine what elements to focus on for further promoting community resilience.* ***If you have not already responded, please...***

In every case the variables should be: 1) when was the last dose? 2) how many total doses? 3) when and how many episodes of the URI illness and how confirmed? 4) baseline cardiovascular or thromboembolic risk factors? Autopsies should be demanded and a registry started.

In terms of cases, deaths, and CFR - the US case fatality rate is around 57% of the CFR for H1N1 as of June 4th (Peak of the BA.2.x series of variants).

That is the lowest CFR for the entire recognized pandemic period.

"One of the saddest lessons of history is this: if we've been bamboozled long enough, we tend to reject any evidence of the bamboozle. We're no longer interested in finding out the truth. The bamboozle has captured us. It's simply too painful to acknowledge, even to ourselves, that we've been taken. Once you give a charlatan power over you, you almost never get it back. So the old bamboozles tend to persist as the new ones rise."
