Welcome to our **Friday News Edition** with curated news of the day and memes at bottom. The big news is the WEF meeting in Davos, though it looks like about half the folks didn't show -- scared maybe? That didn't stop them from being an echo chamber for the need to take immediate action for every crisis known and made up. The cabal continues its relentless efforts towards a new round of masking, vaccine IDs, continued vax mandates, climate lies, and the like. Despite this, there has been lots of good movement towards truth in various pockets around the world, including more doctors coming around (slowly). DeSantis wants to shield FL from all future plandemic tactics, and in NZ, Ardern is out! To top it off, we're seeing increasing awareness that just about everything we've been taught or told by government and media is a lie - Jan 6, JFK assassination, Nixon's Exit, OK City Bombing... the peeps are **waking up!** Finally, it's not too late to watch livestreaming of **The Greater Reset IV: Co- Creation** or to catch recent presentations -- see below for details.

PSYCHOLOGY NUGGET re ADMITTING VACCINE HARM:

Now that global vaccination is done, they won, they can admit that vaccines cause harm or even were ineffective.

It actually helps them to admit these things now.

It's called "cooling the mark out".

The mark is those who were aware.

The classic exposition of the practice of helping victims of a con adapt to their loss is the sociologist Erving Goffman's 1952 article "[On Cooling the Mark Out](#)." Like everything by Goffman, it's worth reading if you want to know what much of life is really all about. (If you don't, you can skip it.) "After the blowoff has occurred," Goffman explained, about the operation of a con, "one of the operators stays with the mark and makes an effort to keep the anger of the mark within manageable and sensible proportions. The operator stays behind his team-mates in the capacity of what might be called a cooler and exercises upon the mark the art of consolation. An attempt is made to define the situation for the mark in a way that makes it easy for him to accept the inevitable and quietly go home. The mark is given instruction in the philosophy of taking a loss." What happened stays out of the paper.

Thomas Massie 🗳️ @RepThomasMassie · 7h

How does declining to take a drug that doesn't meet the accepted definition of "vaccine" make someone an "anti-vaxxer" ?

Vaccination (pre-2015): Injection of a killed or weakened infectious organism in order to prevent the disease.

Vaccination (2015-2021): The act of introducing a vaccine into the body to produce immunity to a specific disease.

Vaccination (Sept 2021): The act of introducing a vaccine into the body to produce protection from a specific disease.

Strokes, heart attacks, sudden deaths: Does America understand the long-term risks of catching COVID?

BY CAROLYN BARBER

October 6, 2022 at 6:07 PM GMT+3

1987: This is your brain on drugs
2023: You can't afford the egg, the
gas stove is being outlawed, the
only thing you can get is the drugs.

I thought about telling
you a Covid-19 joke.
But there is a
99.62% that you
won't get it!

“One of the saddest lessons of history is this: If we’ve been bamboozled long enough, we tend to reject any evidence of the bamboozle. We’re no longer interested in finding out the truth. The bamboozle has captured us. It’s simply too painful to acknowledge, even to ourselves, that we’ve been taken. Once you give a charlatan power over you, you almost never get it back.”

~CARL SAGAN
