

Newsletter - Monday January 23, 2023

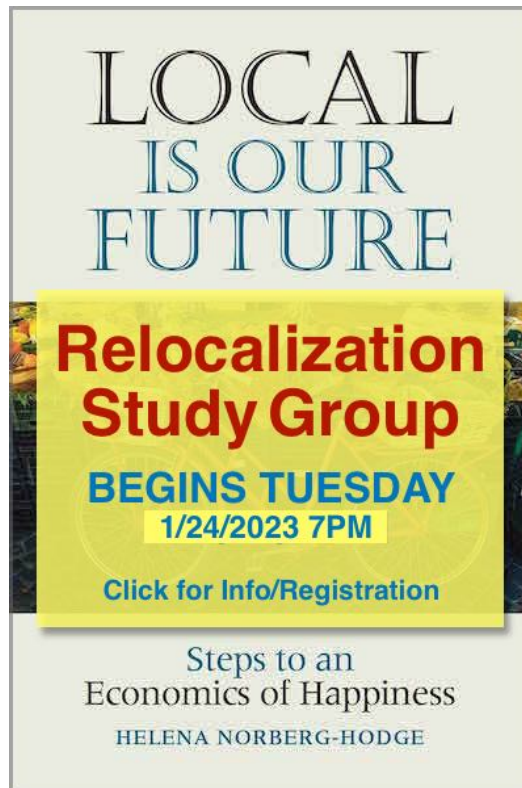

Welcome to our **Monday Solutions Edition** with curated news of the day and memes at bottom. In addition to lots of great prepper and regenerating society ideas, you can catch the videos from this past weekend's Greater Reset conference - on creating parallel economies and agoristic networks, resetting our relationship to technology, and much more - well worth the deep dive! James Corbett breaks down the great food reset, revealing the "man behind the curtain." Listen to Melissa Blasek discuss Rebuild NH's 2023 legislative outlook and learn about actions you can take today. Finally, neither the White House nor the WHO seem to have received the memo on vaccine dangers to pregnant women, babies, pilots, Elon, mice -- or the rest of us. *Read on...*

Please join us for our **Community Zoom Chat today at 1PM**, where we'll be covering news of the day and the upcoming relocalization study group:

★ 11:00 a.m. – OPPOSE – HB 353, establishing an interstate compact for universal healthcare. This bill is as described: a first step towards socialized medicine. We at RebuildNH have fought to remove more government from healthcare since watching the disastrous government response to the Covid pandemic, but this bill seeks to create a completely government controlled healthcare system, beginning by creating interstate compacts. Who pays? While the bill is unclear and doesn't even remotely seek to estimate the cost, we know that all taxpayers will pay, handsomely.

@NaturallyFTW

Did you know?

There's NO LIMIT on # of vaccines kids can receive at one time. Often, a few-months-old baby receives EIGHT or more vax doses at once. Now they're adding in the Covid-19 "vax." Vaccines aren't tested in combination for safety.

We need to end this madness.

BABIES OFTEN GET 8 VACCINES AT ONCE

How many vaccines can be given during an office visit?
With rare exceptions*, all vaccines can be administered at the same visit. **There is no upper limit for the number of vaccines that can be administered during one visit.** ACIP and AAP consistently recommend that all needed vaccines be administered during an office visit. Vaccination should not be deferred because multiple vaccines are needed. All live vaccines (**MMR, varicella, live attenuated influenza, yellow fever, and oral typhoid**) can be given at the same visit if indicated. If live vaccines are not administered during the

Covid-19 Vaccine Hesitancy In Populations That Actually Pay Attention

Abstract

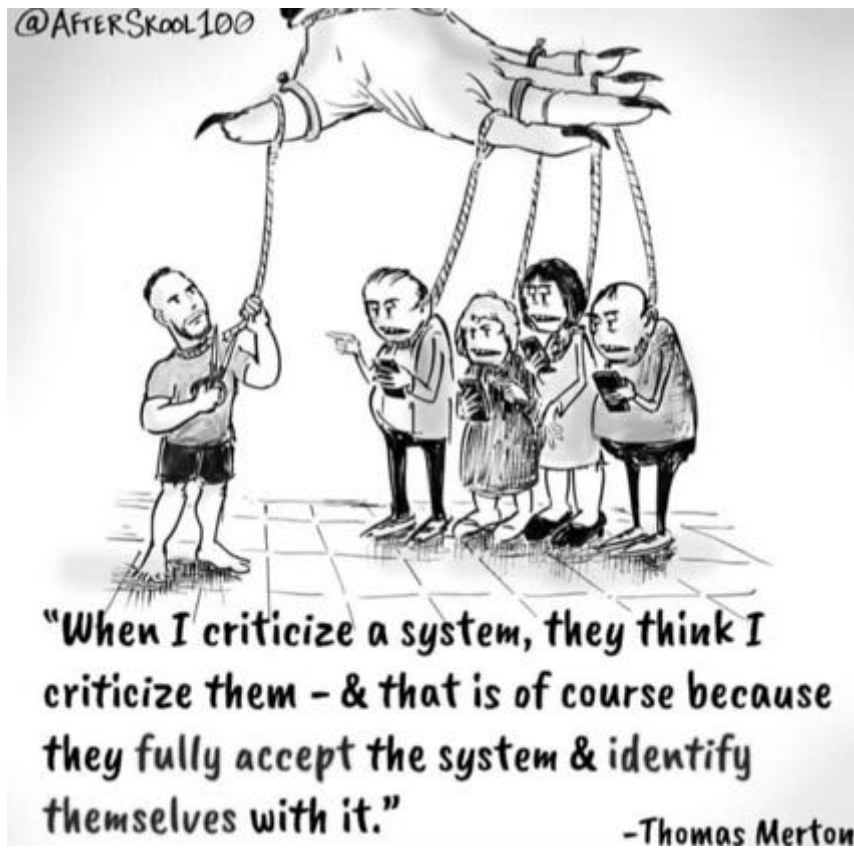

In this study we aimed to assess reasons why there is so much Covid-19 vaccine hesitancy. Our research involved actually listening to people's responses and not writing the sort of tone-deaf vaccine hesitancy papers that are generally written. Our results show that from 2021 to the present, people have noticed that their friends and relatives were getting all kinds of side effects from these toxic shots and were getting infected with Covid-19 anyway. These people-who were actually paying attention to this shit were also reading scientific papers and case reports on adverse events. Most were even rolling their eyes when we mentioned government propaganda on Covid-19 vaccines. In summary, we found that vaccine hesitancy was caused by people just paying attention to shit and reading scientific reports which show that Covid-19 shots are basically shit.
