Welcome to our **Friday News Edition** with curated news of the day and memes at bottom. Like the quake in Turkey and Syria, it feels as if the 24/7 lie-and-corruption machine is about to break apart under the seismic impact of truth: The US House ends the Travel Vax mandate, NYC ends its Vax mandate, Ecuador becomes latest country to take legal aim at the COVID planners, the #RussiaGate story collapses further, Seymour Hersh exposes US culpability for the Norstream pipeline bombing, and the DEI and Transgender Transition movements continue to take hits. Meanwhile, as Congress gets COVID and Censorship hearings underway, many government officials are frantically backtracking - including Fauci. But tone-deaf (and science-blind) toadies keep pushing vaxxes (the COVAX was just added to childhood vax schedule), and are now fear-mongering over a bird flu outbreak, while the deep state continues its agenda towards all-out War with Ukraine (and soon, it seems, against balloon-wielding China), pushes forward with the CBDC rollout and crypto takedown, and has just targeted James O'Keefe and Dr. Simone Gold for elimination. **Let the Games Begin (again)!**

Rise Up NH Weekly Zoom 2/6/23 - Monday featured an open discussion on a number of topics: upcoming NH legislation and events; CBDCs and how these could end local banks; NH schools pushing vaccines; local news suppressing truth about vaxxes and how this is connected to the money machine; the conflict over the legal grounds on which to sue for the vaccine fraud; whether certain news like the Project Veritas expose or the Damar Hamlin event are limited hangouts as the powers that be wind down the COVID psyop; election fraud via hackable black box machines; are all government reps controlled? In Keene Sentinel this week:

COVID vaccine mandate was smart policy; keep it handy

By NEW YORK DAILY NEWS

When he was New York mayor in 2021, Bill de Blasio was right to impose a COVID vaccine mandate for anyone employed by the New York City municipal government. And during his time as mayor, Eric Adams was right to keep the requirement in place for the past year and successfully defend it in court. The “no jab, no job” regulation has been consistently upheld by state and federal courts.

And it worked. Adams now reports that 96 percent of the city workforce has completed their initial round of the vaccine, noticeably higher than the overall city average of 80 percent. The price of the rule

was de minimis, with only 1,780 fools losing their jobs for some cockeyed belief in “freedom” or “liberty.” We love both concepts dearly, but there’s no “right” to a public sector job. If you really want the government to stay out of your life, getting a paycheck from the taxpayers seems like a bad fit.

Furthermore, if you deny the proven safety and effectiveness of the Trump-developed, Biden-distributed COVID vaccines — which have saved millions of lives — what does it say about your judgment? The same for those who lamely tried fake excuses on medical grounds or religious objections and anyone else who follows the health care prescriptions of anti-vaxxer Kyrie Irving or podcaster Joe Rogan.

These dopes who lost their jobs hope-fully didn’t lose their health or their lives from the ravages of COVID. While they are not entitled to their old jobs back, once the current employee mandate lapses on Friday, assuming they are alive and fit, they are welcome to apply for openings.

As for the end of the no-exception vax for everyone rules announced by Adams Tuesday, we won’t know for some time if COVID vax rates decline dangerously. But we do know that the mayor and his health commissioner can always switch it back on if needs be.

The mandate works. It is just and fair and it saves lives. Mr. Mayor, keep it nearby and at the ready if things go south again.

🚩 "A Mutant H5N1 strain" (deadly Bird Flu) is on the loose now. ONE QUESTION: Which lab did this one come from?

"MUTANT STRAIN" OF DEADLY "BIRD FLU" Now Capable of Mammal Transmission

Bird flu — known more formally as avian influenza — has long hovered on the horizons of scientists' fears. This pathogen, especially the H5N1 strain, hasn't often infected humans, but when it has, 56 percent of those known to have contracted it have died.

Alarming, it was recently reported that a mutant H5N1 strain was not only infecting minks at a fur farm in Spain but also most likely spreading among them, unprecedented among mammals. Even worse, the mink's upper respiratory tract is exceptionally well suited to act as a conduit to humans, Thomas Peacock, a virologist who has studied avian influenza, told me.

Government, vaccine industry nexus compromised health security of US citizens, says Robert F Kennedy, Jr

"We believe that at least 650,000 lives were lost because of suppression of effective treatments. By all appearances, the government had a plan and wanted to ram it through at any cost, and it did."

This is literal misinformation for young people from @DrJohnTorres on @TODAYshow - particularly young men. In a piece about heart issues in young people, he cited myocarditis stats for the whole population, not stratified by age or gender. today.com/health/covid-h...

- Stay up to date on your vaccinations. Research shows that you're 11 times more likely to develop myocarditis from COVID itself versus the vaccine, NBC News senior medical correspondent Dr. John Torres said during a TODAY segment on Feb. 9.

Sounds like she heard the word "equipoise" on NPR and decided to drop it in conversation to show how intelligent she is.

Anyway, there were many, many, many studies down showing the failure of masks. Just that CDC, blind in its arrogance, ignored them.

Michael P Senger @MichaelPSenger · Feb 9

Today: CDC Director Walensky tells Congress that no RCTs were conducted to determine if masks prevent COVID because it was too obvious that they worked.

"I'm not sure anybody would have proposed a clinical trial because, in fact, there wasn't equipoise to the question anymore."

In 1972, French Scientists gave cancer patients BROMELAIN 🍌 & it led to remissions

Some of the effects of bromelain are attributed to its capacity for selective proteolytic removal of cell surface molecules affecting lymphocyte activation and migration. On the other hand, bromelain-containing fractions promote secretion of cytokines, induce phagocytosis and cytotoxicity by leukocytes [11], [12], [13]. In 1972, it was demonstrated that oral administration of crude bromelain brought remarkable remissions of malignant tumors with relatively little side effects to cancer patients [14]. Subsequent studies confirmed the inhibitory effect of crude extracts and bromelain fractions on tumor cells [15], [16]. A possible mechanism for this action was the *in vitro* differentiation of leukemic cells mediated by bromelain. Batkin et al. [17] reported that bromelain administered subcutaneously to mice drastically reduced the subcutaneous uptake of Lewis lung tumor cells, compared to untreated controls. This and other subsequent reports confirm the protective antitumoral and antimetastatic effect of bromelain.
